

Application areas

- Designed as a traditional toilet cleaner
- Also suitable for use in urinals

Features & benefits

A bleach free biological approach to the cleaning of toilets.

The natural alternative to bleach, Bio TCD uses friendly bacteria and enzymes to naturally break down any waste present in the toilet bowl.

Bio TCD contains biodegradable cleaning agents and scale removing additives to digest even the most stubborn of stains, leaving your toilet sparkling clean and with a fresh alpine scent.

- Powerful & effective
- Long lasting action
- Environmentally friendly
- Pleasantly fragranced
- Bleach free
- Hazard label free
- Septic tank friendly
- pH 7.5

How to use

Bio TCD not only starts working on contact but continues to do so long after application. Naturally thickened, it remains on the bowl's surface until next flushed

- Apply to the bowl and scrub with toilet brush.
- Leave on surface of bowl for as long as possible to allow biological digestion to take place. Ideally apply last thing in the evening or at the end of the working day.

Note

- The unique blend of bacteria in Bio TCD continues to work long after application. When used regularly, a powerful bacterial action is established that over time will help reduce the amount of Bio TCD you need to use.
- Do not use with bleach, strong acids, caustic / alkaline based products or disinfectants: these will neutralise the bacteria and affect Bio TCDs performance.

Pack sizes

Description	Case size	Order code
750ml applicator bottles	Case of 12	BIO-TCD-750ML12
5 Litre container	Case of 2	BIO-TCD-5L2
5 Litre container	Case of 4	BIO-TCD-5L4
20 Litre container	Sold individually	BIO-TCD-20L
